Global Prefer Non-Absorbing Stone Sealing Professional Nano-Coating

The Non Absorbing Stone Nano coating shows the following properties:

- Surface is hydrophobic and easy to clean.
- Surface does not change color or haptics.
- Nano-coating can be removed by abrasion, friction and acidic detergents and rain.
- Nano-coating is stable from -20 degrees up to +270 degrees Celsius.
- Proper applied Nano-coating stays functional Approximately 1-3 years Based on the abrasion. Refreshing of the Nano coating may be needed during this period.
- Correct handled product is not dangerous for human and environment.
