Global Prefer Absorbing Wood coating Professional Nano-Coating

The Absorbing Wood Nanocoating shows the following properties:

- Surface is hydrophobic and easy to clean.
- Surface does not change color or haptics.
- Nano-coating can be removed by mechanical grinding, friction and acidic detergents.
- Nano-coating is stable from -20 degrees up to +270 degrees Celsius.
- Proper applied Nano-coating stays functional Approximately 3-5 years if no abrasion happens to the surface. Based on the abrasion of the surface, refreshing of the coating may be needed.
- Correct handled product is not dangerous for human and environment.
